

Use fixtures to help support power tools **Reduces high hand force - gripping**

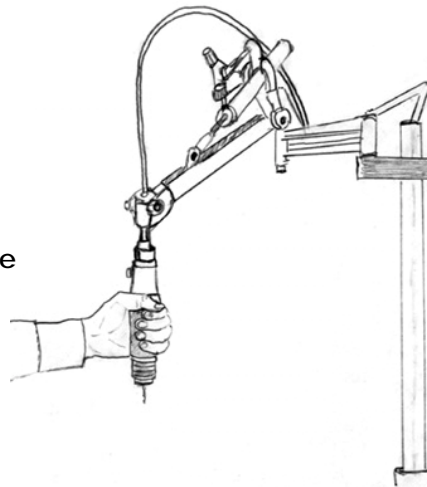

Counterbalances make tools feel weightless.

Torque reaction bars absorb reaction forces.

Articulating arms both balance the weight of the tool and absorb torque reaction.

Other benefits:

Tool supports:

- Reduce worker fatigue and allow use of larger, more powerful tools to get the job done faster.
- Can help by keeping tools out of the way, but located within easy reach.
- Can be mounted in a variety of ways – on tracks, mobile fixtures, jib cranes – to make them more movable.
